LETTERKENNY ARMY DEPOT

Force Sustainment

LEAD's Force Sustainment Systems branch provides superior quality and customer support ensuring the warfighter has fully operational equipment to sustain good health, morale and welfare both on and off the battlefield.

The Workforce:

The Force Sustainment Systems Branch team at Letterkenny offers years of experience in the maintenance of field feeding, health and welfare, and field sanitation equipment. Sound program management, quality sustainment of equipment, reliable technical support and highly responsive field support are at the forefront of what we provide. Our teams expertise comes from years of repairing numerous types of equipment that sustains a healthful fighting force in the field environment. We are always eagerly looking forward to any new challenge driven by this nations ever-growing technology and fostering innovation that improves the warfighters' well being.
